NEW IN STOCK**Hylite - brushed lacquered**

Hylite is an aluminium composite panel with aluminium surfaces and a polypropylene core. The panel is available with a protective film on both sides. HYLITE® offers a wide range of processing possibilities. However unique is the ability to deep draw the material and to achieve various surface effects through powder coating as HYLITE® is resistant to temperatures up to 150 °C. HYLITE® is three-dimensionally deformable, temperature resistant, stable and rigid, also offering many application possibilities due to the hinge effect.
